26750 Providence Parkway, Suite 210  
Novi MI 48374  
(248)465-4782

## Sports Physical Information

Providence Athletic Medicine recognizes the many needs of the athlete. With growing concerns regarding concussions and cardiac health in young athletes we feel it is necessary to offer options for your child's safe participation in sports. We still offer our thorough pre-participation sports physical for \$35.00. For an additional small nominal fee we have added options to upgrade the basic sports physical to include an EKG or Baseline Concussion test or both.

## SPORTS PHYSICAL LEVELS

**SILVER:** \$35.00 Sports Physical

**GOLD:** \$55.00 Sports physical + Baseline Concussion Testing  
Or EKG

**PLATINUM:** \$75.00 Sports Physical +  
Baseline Concussion Testing + EKG

The EKG is used to help detect any cardiac abnormalities. Recommendations will be made based on EKG results.

The Baseline Concussion test is a computer test, ImPact, used to establish your child's normal cognitive baseline. If your child obtains a concussion during the season similar testing can be performed and compared to their established baseline to help determine when they have healed. Any post concussion testing costs \$20/test.

EKG and Concussion testing are recommended for ages 12-18.

Providence Athletic Medicines goal is to provide you with the best possible care. The first steps to good care are prevention and preparation.

Please feel free to call the office with any further questions. (248) 465-4782.
